

VAN 89

KNITTING PATTERN

STATIC
CARAVAN

INSTRUCTIONS

Cut along solid outline, bend along dotted and internal solid lines.

Use paper glue or glue stick on the tabs and tape on the legs.

If you absolutely HAVE to run around with sharp blades, then point outwards, slashing from side to side while uttering blood-curdling screams and yelling loudly.

Hints:

Use good quality card to make your van, fold inwards to hide lines.

Fold across a long narrow edge like a ruler or table top first to get a smooth edge.

Fold the opposite way first.

Run your fingernail across a cut edge to take off the ridge that forms by using a sharp blade.

Cut out the window and open the door to create that authentic Static Caravan ambience.
